The killings in #LakeChad is not limited to aid workers. 2 insurgents were recently killed for communication with al-Qaeda in Maghreb. The recorded conversation was played before execution. Nelly Lahoud explains this fratricide in her book "The Jihadis Path to Self-Destruction".

Sadly, this homicide and fratricidal violence has become the norm. The perpetrators of these killings know why they kill, but majority of those killed will hardly understand why they are being targeted. May the souls of those unjustly killed be in peace forever.
